

October 2014

Alumni of Penn State Forestry,

The Penn State Forestry Society is kicking off our Fall 2014 Clothing and Merchandise Sale. As many of you know our annual clothing sale is not only a way to show pride in our training and chosen professions, but it also serves as a major fund-raiser for the Society. The funds raised help the student members of the Forestry Society engage in various outings and professional development activities.

The Society just recently sent five students to the SAF national convention in Salt Lake City. These students had the opportunity to gain both national and international exposure to various forestry practices and careers. One student already secured a summer internship as a result of a connection he made at the convention.

We also just attended the 30th Anniversary of The Roach-Bauer Forestry Forum in Kane, PA where the students were introduced to a dynamic group of forestry professionals in northwestern Pennsylvania ranging from researchers to practitioners.

In the future we have planned opportunities for the students to be introduced to PA Game Commission foresters and see examples of forestry applications in habitat management, a possible timber-sale tour, and other professional development activities. In addition to these activities, the Forestry Society engages in various outreach and service functions. We continue our affiliation with The Society of American Foresters as a student chapter and we have also newly created an affiliation with The Pennsylvania Forestry Association.

Conveyed above is a sampling of the activities the Penn State Forestry Society engages in. We are always looking for more opportunities to partner with forestry related organizations and professionals and welcome any ideas for future endeavors.

Attached is a merchandise order form that details all of the items for sale and the instructions to place an order. If you have any questions do not hesitate to contact me. Thank you very much for your continued support of the Penn State Forestry Society and the future of our profession and passion.

Respectfully,

Tim Ackerman
