Corrections to

Multivariate Analysis for Ecologists: Step-by-Step
JeriLynn E. Peck
Second Edition, 2016

Pg. 11, definition of *type II error*:
This should read "leading us to falsely <u>retain</u> a false hypothesis".

Pg. 11, Bonferonni <u>correction</u> in right column:
I wrote divided when I meant multiplied, so in two places this should read:
"correction involves multiplying your observed alpha"
"should thus be multiplied by 9"

Pg. 102, type II <u>error</u> in left column:
This should read "of falsely <u>accepting</u> a false hypothesis".

Pg. 141, Figure 28.1
I included one too few paired distances in the example calculation shown for
within-group sums of squares (i.e., for 4 sample units, there are 6 unique pairs of
sample units). The figure should instead be:
