

"WILDLIFE FACT FILE" GUIDELINES

1. Each student must pick a different "animal" (first come, first served)
2. "Animal" includes mammals, fish, insects, reptiles, amphibians
3. The animal does not have to live only in your state or be native to the state, as long as it is currently living in the wild in your state/region/country
4. At least 3 different resources must be used to find the information listed on the "Wildlife Fact File" sheet
5. Information on the fact file sheet must be written in complete sentences in your neatest handwriting
6. You will be given time in class to do research and complete this assignment, but you may also work on it at home
7. The completed fact file sheet is due two weeks from today
8. You will present your animal to the class shortly after the due date
9. You will be graded on content, editing, neatness, and effort
