

Management of Commercial Fisheries Part 1 (Appendix II)
Worksheet

Answer the following questions using complete sentences.

1. In your own words describe what a fishery is. Be sure to include all the parts that make up a fishery and describe what they are.

2. List some examples of both freshwater fisheries and saltwater fisheries and what kind of products might be taken from both.

3. Describe what a renewable and a nonrenewable resource are. Give examples of each.

4. Why are fisheries considered renewable resources?

5. How has the use of fisheries changed since 1860?

6. List 2 acts that helped fisheries and describe what they did to protect fisheries.

7. In a short paragraph describe how you would manage a fishery with the information that you have now.
