WORKING PLAN

Mont Alto State Forest, ^{Franklin} Adams-County, Pa.

By Jesse D. Diller

Objective:

To select and test blight-resistance chestnuts. To determine which of the numerous Asiatic accessions obtained through direct importations, or from nurserymen, are most likely substituted for our native, blight-susceptible chestnut.

History:

4 plots, 150 trees each
This two-acre chestnut plantation was established spring of 1938 on the east slopes of Green Mountain on the eastern border of the Mont Alto State Forest, about 4 miles from Fairfield, Pa. i.e.- a cooperative planting by the U. S. Forest Service, and the Pennsylvania Dept. of Forests and Waters. The latter cleared the site of pole-sized hardwoods and fenced the area against deer and livestock. The former furnished the planting stock, supervised the planting, and released the trees from sprout hardwoods during the first 10 years, and assumed full responsibility in tree measurements and note taking on blight resistance, etc.

Present Status:

On Sept. 12, 1952 a show-me-trip was conducted to this then 14-year old planting. Approximately 50 people were in attendance, representing federal and state foresters, extension service foresters, dendrologists, game technicians, and forest pathologist.

Publication

Diller, Jesse D. (1954) "A Potential Timber-Type Chinese chestnut". For. Res. Notes No. 37: 1-4. Northeastern Forest Exp. Sta.

Recommendations:

It is recommended that this 2-acre Asiatic chestnut plantation (which also includes several other exotic species) be continued as a permanent plot for obtaining (a) data on rate of growth of the exotics, (b) information on the nut quality and quantity of the several chestnut accessions represented and (c) for demonstrational purposes to the public since this planting is readily accessible to both Washington D. C. and Harrisburg, Pa.

Height and diameter measurements should be continued at approximately 5-year intervals, preferably by the U. S. Forest Service, since this planting is located less than 80 miles from the VPIERC Headquarters.

It would be highly desirable if it can be arranged, if a thorough cleaning would be performed in this planting within the next 12 months by the Pa. Dept. of Forests and Waters. Care must be exercised, however, because there are several American chestnut grafts (of scions from some very promising native chestnut trees that appear to have developed a natural resistance to blight) grafted on to volunteer native chestnut sprouts as root stock. These occur mainly between rows within the fenced plot, and could easily be mistaken for the ordinary volunteer growth of chestnuts on the area.

SUMMARY OF RESULTS

Mont Alto State Forest

3 pls. 3/29/15

9/12/44 - Nuts forwarded to Gainesville, Fla.,
then returned "Unclaimed - unknown"
Zeigler's address not known - keep card in "live file".
12/18/45 J. C. Middour, Assistant, Division of Forest Management,
Dept. Forests + Waters, Harrisburg, writes that the trees planted at
Mount Alto are growing, some bearing; about 10% of trees attacked by
blight, but all are alive. The trees planted in Bedford County
were examined in 1938; they were frozen back severely and doubts if
any are alive.

Mont Alto, Pa. Address

In spring of 1927 we received two shipments of very good stocks totaling 100 trees. Prior to that we had received about 6 trees of the Hairy Chinese Chestnut. All grew for awhile, but half of the earlier planting finally succumbed to Bark disease. Trees planted last spring were badly grazed off by deer, but are nearly all still alive.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Dr. J. D. Diller, Beltsville Experimental Forest, U. S. Forest Service, Beltsville, Md. DATE: Feb. 7, 1956

FROM : Frederick H. Berry, Fruit & Nut Crops, Plant Industry Station, Beltsville, Md.

SUBJECT: Hybrid Chestnut Trees Planted at Mont Alto, Pa.

According to our records the following chestnut hybrids planted on the Mont Alto Forest are now dead:

6637
6737
6837
6937
7137
7337
7437

At your convenience will you please check your records and let us know if any of the above are still alive. Otherwise we will place the cards for these hybrids in our DEAD file.

F. H. Berry
